A roll of glass fiber fabric, showing a dense, woven texture, is positioned at the bottom center of the page. The background features a light purple and white color scheme with abstract, flowing lines and a circular graphic element containing text.

China Jushi Co.Ltd  
specializes in the production of  
glass fiber. The company has attained  
the leadership position in the global glass  
fiber industry in terms of Capacity, Technology,  
R&D, Quality and Marketing.

Jushi people adhere to our core values of "Behavior, Innovation, Responsibility, Learning, Enthusiasm" to build the company into an international corporation with the largest scale, leading technology, excellent team, lean management, powerful execution, outstanding operating results and high quality growth. China Jushi strives to lead the modernization of China's glass fiber industry and maintain the leadership position in the global glass fiber industry through endless pursuit of innovation and excellence.

## COMPANY PROFILE

# GOALS

## CREATION OF A NEW SOLUTION FOR HIGH-END COMPOSITES

China Jushi has developed E8 High Modulus Glass Fiber in 2016, achieving a revolutionary breakthrough in the glass fiber industry. E8 glass fiber offers higher modulus and better fatigue resistance than E7 high performance glass fiber and S-glass fiber, and now can be manufactured with tank furnaces in a stable and efficient way. E8 has much better cost performance than S-glass fiber, making it more competitive than the latter. E8 is designed mainly for use in the wind blades and will create tremendous value for the wind energy market. It will be able to further promote the innovation and application of large size wind blades. E8 will enable the wind blades of the same design to have higher modulus, less deformation under the same wind load and reduced blade weight. In the meantime, wind blades made of E8 will be able to reduce the weight and cost of power generation and promote the service life of wind turbines.

weight and cost of power generation and promote the service life of wind turbines

Compared with E6 and E7 glass, E8 offers the following unique benefits:

- Higher modulus, 17% higher than E6 glass, 7% higher than E7 glass;

E8 glass fiber is made from a unique glass composition which improves the corrosion resistance in a variety of circumstances. Compared with E6 and E7 glass fiber, E8 shows significant improvement in chemical corrosion resistance in neutral, acidic or alkaline solutions with especially superior corrosion resistance in acidic environments. E8 is therefore particularly suitable for applications which have special requirements on environment

# EVOLUTIONARY GLASS SOLUTION FOR COMPOSITES

COMPARISON IN WEIGHT LOSS IN 10% HCL SOLUTION AT 100°C FOR 24 HOURS

COMPARISON IN WEIGHT LOSS IN 10% H<sub>2</sub>SO<sub>4</sub> SOLUTION AT 96°C FOR 24 HOURS

Item	Testing Method	Unit	E6	E7	E8
Weight loss in acidic solution	Soaking in 10% HCL solution at 23°C for 24h	%	0.39	0.23	0.20

# EXCELLENT MECHANICAL PROPERTIES

LE is a high-performance glass fiber with higher modulus and higher strength. E9 glass fiber will offer more superior mechanical properties, dimensional stability and fatigue resistance, and can meet higher design requirements of composite materials to be used near demanding environments. E9 glass fiber can be widely used in the fields of large wind blades, military equipment, high-speed rail, and commercial aircraft.

Test Sample	Property	Standard	E6	E7	E9
 Tensile property of impregnated coating. Epoxy resin	Tensile strength (MPa)	ASTM D3343	2500-2700	2800-3000	3100-3500
	Tensile modulus (GPa)	ASTM D3343	81-83	89-91	95-98
130 g/m <sup>2</sup> LE fabric, (woven in 0° direction), woven process, Epoxy resin	Tensile strength (MPa)	ISO 527-5	1	1321.7	1332.3
	Tensile modulus (GPa)	ISO 527-6	1	40.5	51.6
	Fiber volume content (%)	ISO 1172	1	53.6	53.8
	Compressive strength (MPa)	ISO 14128	1	672.8	1045.9
	Compressive modulus (GPa)	ISO 14128	1	40.1	52.1
	Fiber volume content (%)	ISO 1172	1	54.4	54.2

## CERTIFICATIONS

### CHINA JUSHI ALWAYS ADHERES TO ITS FUNDAMENTAL MANAGEMENT PRINCIPLES:

- o Apply science and technology for development,
- o Build the brand name to expand market share.
- o Emphasize management to improve efficiency, and
- o Employ talented people to enable future growth.

China Jushi owns proprietary, world-class core technologies for large E-glass fiber furnaces, C-glass fiber furnaces and high-performance glass fiber. It has achieved management system certifications to ISO9001, ISO14001, OHSAS18001, ISO10012 and ISO17025. Its testing center has been certified by both China National Accreditation Board for Laboratories (CNAS) and Germanischer Lloyd (GL). The fiberglass rovings and chopped strand mats under the trademark "JUSHI" have been listed as "China Top Brand" products and the trademark "JUSHI" has been recognized as "China Famous Trademark". The principal products of Jushi Group have been approved by DET NORSKE VERITAS (DNV), Lloyd's Register (LR), China Classification Society (CCS), Germanischer Lloyd (GL) and Attestation De Conformité Sanitaire (ACS).

## TECHNICAL COLLABORATION AND SUPPORT

China Jushi possesses world class core technologies and advanced testing and analysis capabilities for glass, organic chemistry, fiberglass and composites. Jushi has established a global network of marketing and technical service professionals to help customers solve problems in materials development and optimization. Jushi collaborates closely with customers to address market challenges and promote the growth of the composites industry. China Jushi will share our information on E8 glass fiber and our knowledge of compounding technologies and processes.
